Sub: In-plant Training

Dear Sir,

Warm greetings from VIT!

VIT University has made a mark in the field of higher education in India, over the past 30 years, by imparting quality education in a cross-cultural ambience combined with extensive application oriented learning process. We strongly believe in having a close and mutually beneficial association with the industries in order to promote experiential learning and expose various project practices followed in industries. In this connection, the students are encouraged to take up in-plant training with leading institutions / industries / research organizations.

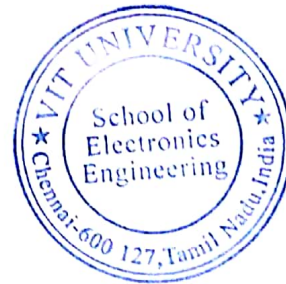

As part of our B.Tech curriculum, the student has to undergo in-plant training during the vacation period. In this regard, may I request you to kindly permit Mr. Yash Jain (16BLC1074) who is in year 2 of B.Tech ECM in our university to do in-plant training at your concern for a period of 1 month starting from 01/05/2018. Your assistance in arranging this in-plant training will be highly appreciated.

Thanking You.

Yours sincerely,

DR. SUSAN ELIAS
